

I tested on Sprint VRS, Hamilton VRS and Sorenson VRS. I recommend Sorenson VRS because it has much much better features on VP100 and VP 1000 do not have it at all. And also I love quality (Sorenson) interpreters much better than other. I rather use Sorenson VRS!!! Many deaf people forgot how to thank Sorenson for VP100 on their own pocket and better services! So I do not have any complaints about Sorenson. Janice Cordero
